SUMMARY

Mid-Senior Backend Engineer at 15Five. Works closely with other members of R&D to produce high quality code and well tested features. Enjoys developing working solutions to difficult problems and working with other engineers and product teams to generate great outcomes for the business. Interested in continuing to grow skills and learn new technologies. Looking for roles that provide the opportunity for professional mentorship.

TECHNICAL SKILLS

Languages: Python, Javascript, HTML, CSS
Libraries: Django, Django REST Framework, React, Redux, Material UI, AG Grid, Pandas, Bootstrap, JQuery, Express, Node.js
Applications: PG Admin, Putty, Postman, Visual Studio Code, Pycharm, IntelliJ, MongoCompas, MySQL Workbench, Redash, Metabase, Datadog

EXPERIENCE

Mid-Senior Backend Engineer   2020-Present

15Five   San Francisco, CA

Backend Engineer at 15Five. 15Five is a Series C startup devoted to creating human-centric relationships between HR and employees, driving positive business outcomes by increasing employee engagement and retention. Works principally in python, developing test-backed code that powers a broad suite of features and functionality.
- Writes APIs, scripts, and business logic that are instrumental to the success of the product.
- Creates dashboards in tools like Redash and Metabase to provide visibility on important metrics.
- Participates actively in code reviews and continual deployment of the production application.
- Readily helps and collaborates with other engineers to maximize efficiency and knowledge sharing.

Software Engineer   2020-2022
UBS Investment Bank   Nashville, TN

Software Engineer in the Evidence Lab division of UBS on the 1Truth team. 1Truth is a mission critical proprietary application used by UBS's analysts to store, track, and generate reports on market data. Developed both backend and frontend features as needed. Worked closely with QA and the business to produce sterling, test-backed code and requested functionality.
- Provided test-backed features in a timely manner for the application's business users.
- Worked with team to make architectural decisions that ensured 1Truth was well designed and scalable.
- Managed the complicated process required to publish software changes at the firm.
- Developed and managed a growing system of more than 200 APIs to deliver data to stakeholders.

TIM EDWARDS

Full Stack Bootcamp Teacher's Assistant   2019-2020
Vanderbilt University   Nashville, TN
Aided lead instructor in teaching Full Stack web development curriculum to students. The course focused on the MERN stack (MongoDB, ExpressJS, ReactJS, and NodeJS) and computer science fundamentals. Responsible for grading student homework and projects, assisting students as they worked through the curriculum, and using data analytics to ensure a high standard of competence and preparedness.
- Graded homework in a timely manner.
- Assisted lead instructor with monitoring class activities and provided assistance when needed.
- Prepared for lessons by ensuring a high degree of personal proficiency in subjects to be covered in class.
